

BLAKE MARVIN

Blake has had a passion for singing ever since he could talk. It was in the third grade that Blake sang his first solo.

Two years ago, Blake recorded his first album in Nashville, where he enlisted the help of both Wynne Adams and Mike Chapman, the bass player/ producer that's worked with greats such as Garth Brooks. The album "Keep Movin' On" with its driven attitude and positive lyrics has already sold far better than expected and has now led Blake to start looking toward producing a second album.

The debut performance of "Keep Movin' On" as the opening act for country music legend, Lonestar, kick started Blake's career and opened new doors.

Last summer was full of excitement with Blake and "The Blake Marvin Band" hittin' the road, and performing several great headlining acts for large county fair Grandstand events. Blake was also given the opportunity to open for Tracy Lawrence with the National Anthem in Beatrice, NE.

Currently Blake is gearing up for next year, trying to get a jump start on fairs and events across the country to showcase what is proving to be "One heck of a fun show!" Blake is also working on writing some new music and gathering songs for a new CD that he hopes to release by mid 2010!
